

Actuarial Internship Opportunities with Milliman's Denver Health Practice

Milliman is the country's most prestigious actuarial consulting firm and has offices worldwide. Milliman is divided into four main practice areas – Health, Employee Benefits, Casualty and Life. All of our practices are “owned” by the local Principals who manage them. You can find out more about Milliman at www.Milliman.com.

The Denver Health Practice of Milliman is a growing practice with a wide variety of niche practices, which means that we always have a broad range of work and challenges. Our goal is to be recognized as one of the top consultants in each niche specialty, and our work typically involves the analysis of the financial risks and projections associated with healthcare and healthcare management. We are almost always looking for intelligent and energetic actuarial interns.

The salary potential at the Denver Health Practice of Milliman is virtually unlimited because individuals are paid based upon their contribution to the organization. We work closely with students to assist and support them in their attempts to pass actuarial exams. Students receive generous raises for passing exams. Students are also heavily involved as we stake out additional areas of expertise.

If you are a student interested in pursuing a career in actuarial science, we have the following advice and opportunities for you:

Juniors and Graduate Students: We typically hire several summer interns each year. To help students acquire actuarial experience prior to graduation, our internship program is intended for students who are on a summer break from their current academic program, but who have not yet graduated. In addition to summer internship positions, we will also consider interns who are available full-time for 8-12 weeks at other times of the year (i.e. spring, fall, or winter). Candidates who successfully complete our internship program may have an advantage when new student positions open up. We are currently seeking interns for Summer 2011.

All Students: The time to start taking actuarial exams is now! You should start by visiting the Society of Actuaries web site (www.SOA.org) and understanding the exam process, topics, and timing.

To apply, please forward your cover letter, resume, and other pertinent information to:

Milliman
Denver Health Practice
1099 18th Street, Suite 3100, Denver, Colorado 80202
Denv.Health@Milliman.com

Electronic applications are preferred.

We are committed to responding to every application regardless of our decision. Incomplete applications will not be considered, and no response will be sent.

All applications for summer internships must include a cover letter and resume listing current SOA exam status, expected graduation date, and approximate dates you would be available for an internship (i.e. mid-May to late August).

After reviewing those applications received, we will select the candidates to be considered further and send requests for additional information to each selected candidate. Candidate responses will be reviewed by members of our staff as they are received. We expect to conduct phone interviews no later than mid-February and make internship offers by early March. For internships during other times of the year, please apply at least three months in advance.
