ELIGIBILITY. You must have the course prerequisites listed below and must never have completed with a grade of C- or better a course for which MAC 2312 is a (stated or implied) prerequisite. Students with more than four hours of prior credit in college calculus are required to reduce the credit for MAC 2312 accordingly. It is the student’s responsibility to check and prove eligibility.

PREREQUISITES. You must have passed MAC 2311 (Calculus I) with a grade of C- or better or have satisfactorily completed at least four hours of equivalent calculus courses.

FSU COMPUTER ACCOUNT: Every student must get a (free) garnet FSU computer account so as to receive class email. These are obtained from the web page below.

https://register.acns.fsu.edu/CARS/new_accounts.html

(Students who prefer to read their e-mail elsewhere can have their garnet e-mail forwarded by filling out the webpage at the URL below.)

https://register.acns.fsu.edu/CARS/forward.html

TEXT. *Calculus* (Second Edition), by Hughes–Hallett, Gleason, McCallum, et al. *Careful: Calculus I is using the third edition*

CALCULATORS. Students are required to have the TI-89 programmable graphing calculator. Each test will have a problem which requires having this particular calculator. See the course web page for some web pricing.

MATH and TECHNOLOGY: Students will be using the computer for many things including the program Maple to do some of the assignments for this class. Every Tuesday’s class meets in a computer classroom. Most, if not all, of the computers in the public labs and classrooms have Maple installed. There is a limited web version of Maple available to students at FSU.

COURSE CONTENT. Chapters 7–10 of the text.

COURSE OBJECTIVES. The purpose of this course is to introduce students to more advanced topics in the calculus and some of their applications. The material in this course should be mastered before the student proceeds to courses for which it is a prerequisite. Maple is introduced to improve visualization and ease computation.

ATTENDANCE: Attendance is required. Excessive absences will result in a reduction of the student’s grade.

GRADING. There will be three unit tests and a cumulative final exam. The instructor will give graded group homework and graded Maple projects. In addition, there will be one large two week group project. Numerical course grades will be determined by the larger of $Av1$ and $Av2$ where $Av1 = (6T + 3H + 3MT + 4F) / 16$, $Av2 = (2T + H + MT + 4F) / 8$, $T =$ unit test average, $H =$ homework average, $MT =$ Math Technology and projects (including the large project) project grade, and $F =$ final exam grade. Letter grades will be determined from numerical grades as follows. A: 90-100; B: 80-89; C: 70-79; D: 60-69; F: 0-59. Plus/Minus letter grades will be assigned to high/low numerical grades. A grade of I will not be given to avoid a grade of F or to give additional study time. Failure to process a course drop will result in a course grade of F.

GRADEBOOK: If everything works, the Good Doctor’s grade book for this class will be on-line (sort of) via this url

http://campus.fsu.edu/courses/MAC2312-06.fa01
EXAM POLICY. No makeup tests will normally be given. Late homework or maple projects will not
normally be accepted. A missed test, may be excused if the student presents sufficient verifiable evidence of
acceptable extenuating circumstances. If a test absence is excused, then the final exam will be used for the
missing test grade. An unexcused absence from a unit test will be penalized. An unexcused missed homework
assignment, will result in a grade of zero. Absences from tests and missed homework due to family social
events will not be excused. Acceptable medical excuses must state explicitly that the student should be
excused from class. Students must take the final examination at the scheduled time. Students must bring
FSU ID cards to all tests. Hats with brims are not allowed at tests, baseball caps must be reversed.

PROJECT. You will work on the project in groups of 1–4 students. This project will be a substantial
assignment, giving you a chance to earn part of your grade in an environment which simulates the so-called
“real world” better than does an in-class exam. It will also give your instructor a chance to base part of your
grade on your best work, produced in a setting where time should not be a factor (assuming you start on
your project as soon as it is assigned). The results of your work on your project will be presented in a report
(one report per group). Each member will also submit a “group evaluation” giving their impression of the
relative contribution of each member to the group’s effort. These evaluations are due with the project. It
is not guaranteed that each member of the group will receive the same grade. The reports will be graded
not only on their mathematical content but also on the quality of the presentation: clarity, neatness, and
proper grammar are also important. Both reports and group evaluations must be typed. The project will
be assigned on Tuesday, October 23 and due on Tuesday, November 6.

TEST#1 Tentatively Thursday, September 20. (September 21 is the last day to drop without the dean’s
permission.)
TEST#2 Tentatively Thursday, October 18 or October 25.
TEST#3 Tentatively Thursday, November 29. (December 7 is the last day of classes.)

FINAL EXAM is Wednesday 12 December 7:30-9:30am

COMPUTER CLASSROOM. No food or drinks are allowed in either classroom but especially not the
computer classroom.

MATH HELP CENTER. The Math Help Center is located in 110 MCH (Milton Carothers Hall) next door
to the Love Building. The hours of operation will be announced when they are available.

HONOR CODE. The Academic Honor System of The Florida State University is based on the premise that
each student has the responsibility 1) to uphold the highest standards of academic integrity in the student’s
own work, 2) to refuse to tolerate violations of academic integrity in the University community, and 3) to
foster a high sense of integrity and social responsibility on the part of the University community. Please
note that violations of this Academic Honor System will not be tolerated in this class. Specifically, incidents
of plagiarism of any type or referring to any unauthorized material during examinations will be rigorously
pursued by this instructor. Before submitting any work for this class, please read the “Academic Honor System” in its entirety (as found in the FSU General Bulletin and in the FSU Student Handbook and ask
the instructor to clarify any of its expectations that you do no understand.

AMERICAN DISABILITIES ACT. Students with disabilities needing academic accommodations should: 1)
register with and provide documentation to the Student Disability Resource Center (SDRC); 2) bring a letter
to the instructor from SDRC indicating you need academic accommodations. This should be done within
the first week of class.
