

STUDENT SYLLABUS

MAC 2313–0004

Spring 2019

INSTRUCTOR: Professor Eric P. Klassen

EMAIL: klassen@math.fsu.edu

OFFICE: 114 Love Building

OFFICE HOURS: MW 1:15-2:15

COURSE DESCRIPTION: This course covers functions of several variables and their graphical representations; vectors; partial derivatives and gradients; optimization; multiple integration; polar, spherical, and cylindrical coordinate systems; curves; vector fields; line integrals; flux integrals; divergence theorem and Stokes' theorem.

ELIGIBILITY: You must have the course prerequisites listed below and must never have completed with a grade of C- or better a course for which MAC 2313 is a (stated or implied) prerequisite. Students with more than eight hours of prior credit in college calculus are required to reduce the credit for MAC 2313 accordingly. It is the student's responsibility to check and prove eligibility.

PREREQUISITES: You must have passed MAC 2312 (Calculus II) with a grade of C- or better or have satisfactorily completed at least eight hours of calculus courses equivalent to MAC 2311 and MAC 2312.

LEARNING OBJECTIVES: The purpose of this course is to introduce students to more advanced topics in the calculus and to some of their applications.

COURSE MATERIALS: Calculus (Early Transcendentals) (Eighth Edition), by James Stewart. More information about the text and WebAssign, including purchase options, is at the link

<https://www.math.fsu.edu/~pkirby/calctext/>

COURSE CONTENT: Chapters 12–16 of the text.

GRADING: There will be four unit tests, occasional short quizzes, and a final exam. Numerical course grades will be determined according to the formula $(6U+Q+3F)/10$ where U = unit test average, Q = quiz average, and F = final exam. Letter grades will be determined from numerical grades as follows: A: 90-100; B: 80-89; C: 70-79; D: 60-69; F: 0-59. Plus or minus grades may be assigned. A grade of Incomplete will not be given to avoid a grade of F or to give additional study time. Failure to process a course drop will result in a course grade of F.

TEST#1: Thursday, January 31.

TEST#2: Thursday, February 21.

TEST#3: Thursday, March 14.

TEST#4: Thursday, April 11.

FINAL EXAM: Wednesday, May 1, 12:30-2:30, 102 Love Building

HOMEWORK

Homework problems will be suggested for every section covered. This homework will not be collected or graded, but it is really important for the students to work a lot of practice problems in order to learn the material, so do as many of these problems as you possibly can. Also, a lot of the quiz and test problems will be similar to the suggested homework problems.

COURSE POLICIES:

Students must provide advance notice of absences (when possible) as well as relevant documentation regarding absences to the instructor as soon as possible following the illness or event that led to an absence. Regardless of whether an absence is excused or unexcused, the student is responsible for making up all work that is missed.

See the “University Attendance Policy” below for acceptable reasons for an excused absence.

A medical excuse must state explicitly that the holder should be excused from class. Note that students will not be given excused absences to attend family functions or other non-academic events. Official University activities include official events at which the student is representing the University, such as athletic competitions and academic activities sponsored by a student's academic department or college. Registered Student Organizations (RSOs) and Greek Life activities are not considered official university activities.

If a test absence is excused then, at the instructor's discretion, either a make up exam will be arranged or the student's score on the Final Exam will be substituted for the score on the missed test. Students that do not contact the instructor to provide documentation or do not arrange for a makeup exam within a week of returning from an absence will not be excused. No calculators of any kind are permitted on calculus make up exams given at the testing center. With instructor permission, an unexcused absence from one unit test may have the final exam minus a 20 point penalty applied for that test grade. If a quiz absence is excused, then the next unit test grade will be used for the missing grade. An unexcused absence from a quiz will result in a grade of zero. Students must bring FSU ID cards to all exams.

UNIVERSITY ATTENDANCE POLICY: Excused absences include documented illness, deaths in the family and other documented crises, call to active military duty or jury duty, religious holy days, and official University activities. These absences will be accommodated in a way that does not arbitrarily penalize students who have a valid excuse. Consideration will also be given to students whose dependent children experience serious illness.

ACADEMIC HONOR POLICY: The Florida State University Academic Honor Policy outlines the University's expectations for the integrity of students' academic work, the procedures for resolving alleged violations of those expectations, and the rights and responsibilities of students and faculty members throughout the process. Students are responsible for reading the Academic Honor Policy and for living up to their pledge to "...be honest and truthful and... [to] strive for personal and institutional integrity at Florida State University." (For more details see the FSU Academic Honor Policy and procedures for addressing alleged violations.)

AMERICANS WITH DISABILITIES ACT: Students with disabilities needing academic accommodation should (1) register with and provide documentation to the Student Disability Resource Center and (2) bring a letter to the instructor indicating the need for accommodation and what type.

Please note that instructors are not allowed to provide classroom accommodation to a student until appropriate verification from the Student Disability Resource Center has been provided.

This syllabus and other class materials are available in alternative format upon request. For more information about services available to FSU students with disabilities, contact the:

Student Disability Resource Center
874 Traditions Way
108 Student Services Building
Florida State University
Tallahassee, FL 32306-4167

(850) 644-8504 (TDD)
Email: sdrc@admin.fsu.edu

TUTORING FOR MATH: On-campus tutoring and writing assistance is available for many courses at Florida State University. For more information, visit the Academic Center for Excellence (ACE) Tutoring Services' comprehensive list of on-campus tutoring options - see the Academic Center for Excellence (ACE) Tutoring Services' website or contact tutor@fsu.edu. High-quality tutoring is available by appointment and on a walk-in basis. These services are offered by tutors trained to encourage the highest level of individual academic success while upholding personal academic integrity.

SYLLABUS CHANGE POLICY: Except for changes that substantially affect implementation of the evaluation (grading) statement, this syllabus is a guide for the course and is subject to change with advance notice.
