

Summer 2021 Registration Memo

IMPORTANT DATES, DEADLINES

March 15 - April 16: Summer 2021 registration window and Fall 2021 early registration

April 9 (Noon): Early deadline for funded students (TA, RA) to complete their registration, and the closing date of the GRID. The information you provide in your GRID is final. If you have to change your grid after this deadline, you must see Dr. Kirby.

Summer session dates:

Summer A: May 10 – July 30

Summer B: May 10 - June 18

Summer C: June 21 – July 30

May 10 - May 12: Drop/Add window for Summer A and B.

June 21 - June 23: Drop/Add window for Summer C.

July 15 – July 30: Fall registration window

July 23 (Noon): Fall GRID closes.

DO YOU HAVE TO REGISTER FOR SUMMER SESSION?

If you will work as a TA/RA during summer, then you must register as a full-time student in one of the summer sessions. Courses (with tuition waivers) may be taken in different summer session(s) from the teaching assignment session(s).

If you will not work as a TA/RA during summer, then there are two cases:

- ♦ **Pre-doctoral candidates:** summer registration is optional and you are free to take the summer off.
- ♦ **Doctoral candidates:** you must register for at least 2 dissertation hours every semester, including summer, if you use campus facilities and/or receive faculty supervision.

REGISTRATION HOURS

If you are funded by the department (TA/RA) during summer, then you must register for:

Florida residents:

- ★ 9 hours for summer A (or, B and C together)
- ★ 6 hours for only B, or only C.

Non-Florida residents (includes international students):

- ★ 9 hours for summer A (or, B and C together)
- ★ 6 hours for only B, or only C.

Note: If you receive paychecks in Summer A, regardless of the session in which you take courses, you must be registered for the maximum number of required hours for Summer A

WHAT COURSES SHOULD I TAKE?

★ **Precandidates:** If you are not yet a candidate by June 18 (this is the end of Summer B), then you must register for one graded course. The graded courses offered this Summer are the following:

MAP 5932-01 Data Driven Methods and Control of Complex Systems
Summer C Dr. Aseel Farhat

MAS 5932-01 Homological Algebra
Summer C Dr. Ettore Aldrovandi

MAP 5345-01 PDE's I (for non-specialists)*
Summer A

*This version of PDE's is designed for Engineering and other non-math majors; it will not prepare you to take PDE's II (MAP 5346). Absolutely do not take this if you are ACM.

★ **Preparing for Qualifiers:** If you are getting ready for a summer qualifier, then you can register for MAT 5933 Qualifier Prep for up to 3 hours.

★ **Planning for Summer Candidacy:** If you will take your Doctoral Candidacy Exam in Summer, then you can register for MAT 6908 Candidacy Prep up to 4 hours. Contact Elizabeth Scott to create your Candidacy Prep section.

★ **Candidates:** Candidates must enroll for at least 2 dissertation hours in summer according to university rules, whether they are paid or not by the department. If you are a candidate, and supported by the department this summer as TA/RA, then you can register for 2-9 dissertation hours.

WHAT IF YOU NEED MORE HOURS?

You can register for MAT 6933, Advanced Topics, for 1-3 hours.

You can also register for the TA class, MAT 5941.

If you still need more hours, please contact Elizabeth Scott.

QUESTIONS?

If you don't see the section number you need, or cannot register for a class, see Elizabeth Scott. For other questions such as candidacy, or issues related to timely progress, see Dr. Ökten.

NOTE: Appropriate adjustments to your registration will be made, if necessary, by the Associate Chair for Graduate Studies and the Academic Program Specialist.
