

# MLC – Table of Contents

## Module 2 – Benefits

### Section 1: Basics

- Part 1: Introduction
- Part 2: Review of Common Statuses

### Section 2: Discrete Insurance

- Part 1: General Overview
- Part 2: Level Single-life
  - Example #1: Whole Life
  - Example #2: n-year Pure Endowment
  - Example #3: n-year Deferred
  - Example #4: n-year Term
  - Example #5: n-year Endowment Insurance
- Part 3: Level Multiple-life
- Part 4: Level Single-life Multiple Decrements
- Part 5: Non-level Benefits
  - Case 1: No Patterns or Geometric Insurance
  - Case 2: Arithmetic Insurance
- Part 6: Upper m Insurance
- Part 7: Relating  $A$  and  $A^{(m)}$  for  $\sigma = x$ ,  $\sigma = \overset{1}{x}:\bar{n}|$ , or  $\sigma = {}_n|x$ 
  - Case 1: UDD
  - Case 2: CAA

### Section 3: Continuous Insurance

- Part 1: General Overview
- Part 2: Level Single-life
  - Example #1: Whole Life
  - Example #2: n-year Deferred
  - Example #3: n-year Term
  - Example #4: n-year Endowment Insurance
- Part 3: Level Multiple-life
- Part 4: Level Single-life Multiple Decrements
- Part 5: Non-level Benefits
- Part 6: Relating  $A$ ,  $A^{(m)}$ , and  $\bar{A}$  for  $\sigma = x$ ,  $\sigma = \overset{1}{x}:\bar{n}|$ , or  $\sigma = {}_n|x$   
(UDD and CAA)

### Section 4: Discrete Annuities (Due)

- Part 1: General Overview
- Part 2: Level Single-life
  - Example #1: Whole Life
  - Example #2: n-year Deferred

- Example #3: n-year Temporary
- Example #4: n-year Certain-and-Life
- Part 3: Level Multiple-life
  - Example #1:  $\sigma = xy$  and  $\sigma = \overline{xy}$
  - Example #2: Reversionary Annuities
- Part 4: Level Single-life Multiple States (Markov Chains)
- Part 5: Non-level Benefits
  - Case 1: No Patterns or Geometric Annuities
  - Case 2: Arithmetic Annuities
- Part 6: Upper m Annuities
- Part 7: Relating  $\ddot{a}_x$  and  $\ddot{a}_x^{(m)}$ 
  - Case 1: UDD
  - Case 2: Woolhouse

## Section 5: Continuous Annuities

- Part 1: General Overview
- Part 2: Level Single-life
  - Example #1: Whole Life
  - Example #2: n-year Deferred
  - Example #3: n-year Temporary
  - Example #4: n-year Certain-and-Life
- Part 3: Level Multiple-life
  - Example #1:  $\sigma = xy$  and  $\sigma = \overline{xy}$
  - Example #2: Reversionary Annuities
- Part 4: Level Single-life Multiple States
- Part 5: Non-level Benefits
- Part 6: Relating  $\ddot{a}_x$ ,  $\ddot{a}_x^{(m)}$ , and  $\bar{a}_x$

## Section 6: Relating Insurance and Annuity Present Value Random

- Part 1: For Common Statuses:  $\sigma = x$  and  $\sigma = x:\bar{n}|$
- Part 2: Variance of Annuity Due PVRV's for Common Statuses Above
- Part 3: Derivation of UDD and CAA Formulas

## Section 7: Probabilities of Events Involving Present Value Random Variables

- Part 1: General Overview
- Part 2: Examples
  - Example #1: Discrete Whole Life Insurance
  - Example #2: Continuous Whole Life Insurance
  - Example #3: Discrete n-year Deferred Insurance
  - Example #4: Continuous n-year Deferred Insurance

## Section 8: Recursion and Actuarial Accumulated Values

- Part 1: Recursion
- Part 2: Actuarial Accumulated Values
